

Program	Program NUCLEU PN 09-13 02 09
Project title (ENG):	Researches on the accumulation of substances priority / hazardous soil, water and sediments in the area of complex industrial platform.
Project title (RO):	Cercetari privind acumularea unor substante prioritare/prioritar periculoase in sol, apa si sedimente in zona unei platforme industriale complexe
Duration	2009-2013
Team Leader	Senior Researcher Chem. Mihaela Iordache
Summary (RO) (short description)	Proiectul are ca obiectiv stabilirea gradului de acumulare cu substante prioritare/prioritar periculoase in solul, apa si sedimentele in zona platformei industriale Rm. Valcea. S-au actualizat sursele de poluare generatoare de substante prioritare/prioritar periculoase si s-a evaluat impactul acumularii de substante prioritare/prioritar periculoase asupra ecosistemelor sol, apa/sedimente in zona platformei industriale Rm. Valcea.
Summary (ENG) (short description)	The project aims to determine the accumulation of substances priority / hazardous in soil, water and sediments in the industrial platform Rm. Valcea. Have been updated sources of pollution generating substances priority / hazardous and was assessed the impact of the accumulation of substances priority / hazardous soil ecosystems, water / sediment in the industrial platform Rm. Valcea.
Dissemination of results	
PhD Thesis – Title RO, ENG	Evaluarea poluarii cu substante prioritare periculoase a ecosistemelor apa si sediment in zona unei platforme industriale complexe si metode de distrugere a poluantilor, Mihaela Petrescu, 2013 Evaluation of priority hazardous substances pollution of water and sediment ecosystems in the complex industrial platform area and destruction methods of the pollutants.
